Sewage Treatment plant for Hospitals

We provide turnkey solutions for designing, manufacturing, installation and commission of sewage treatment plants in hospital. These sewage treatment plants utilize advanced technology based on extended aeration principle it comprises of integrated systems which includes screen, collection tank, aeration tank, clarifier, sludge digester, filter press; dual media filters and diffused aeration system. It comprises of an integrated system which includes screen, collection tank, aeration tank, clarifier, sludge digester, filter press, dual media filters and diffused aeration system.

During primary treatment, wastewater is screened for the removal of solids, grit and primary sedimentation. The filter water is chlorinated for disinfection. Part of the wastewater is subjected to secondary treatment standards, which utilize special strains of aerobic bacteria (bacteria that need oxygen to grow) to break down the organic waste left after primary treatment. Secondary treatment process removes up to 95 percent of suspended solids in the waste stream and is significantly more effective than primary treatment in removing biological pathogens from sewage.

We have accomplished several turnkey projects for installations plants in different hospitals of the country. We can offer sewage treatment plant in different capacities based upon the requirement of the clients.

DUST COLLECTION SYSTEMS

HVAC SYSTEM

HVAC SYSTEM that offers most accurate heating, ventilation and air conditioning services to the technology of indoor or automotive environmental comfort. Based on the principles of thermodynamics, fluid mechanics, and heat transfer HVAC is important in the design of medium to large industrial and office buildings such as skyscrapers and in marine environments such as aquariums, where safe and healthy building conditions are regulated with respect to temperature and humidity, using "fresh air" from outdoors

Eco Gardening / Organic Gardening

BioRise got international tie up with ECO-RHYTHM, Land Scaping Company were the experts in Eco-Green Gardening for Hospitals.
